ESD safe

DESCRIPTION

The Bosch Rexroth ESD T-nut 8 M6 is used to fasten components retrospectively into profile slot 8 of aluminum construction profiles. It is inserted into the slot and turned 90 degrees; a driving torque keeps it securely in the base of the groove until the screw is tightened.

- Retrofit assembly without dismantling the profile structure
- Suitable for standard screws with M6 thread
- Steel, galvanized, for reliable hold in the groove base
- ESD version, insulating cap required as accessory

TECHNICAL DATA

Profile slot	8
Thread size	M6
Groove retention (Fmax)	4000 N
Material	Steel, galvanized
ESD	yes

Required accessory	Insulating cap
Packaging unit	100 pieces
Weight	0.00329 kg
