## STANDARDS & COMPLIANCE

ESD safe

## DESCRIPTION

The base plate 1000 x 1200 mm is a surface element for material levels on manual Bosch Rexroth workstations. Its dissipative ESD design protects electrostatically sensitive components, while the smooth surface on both sides allows either side to be used.

- Dissipative ESD design for the protection of sensitive components
- Smooth on both sides and therefore usable either way up
- Fitted into the frame profile that supports surface elements
