DESCRIPTION

The GN300-63-M8-20-SW clamping lever from Bosch Rexroth is used for fast, tool-free clamping and release of components on fixtures and machines. The lever can be lifted against spring force and repositioned without altering the clamping force, which simplifies operation even where the swivel range is limited.

- Body in diecast zinc with black plastic coating
- Steel parts galvanized, strength class 5.8
- M8 threaded stud with length L 20 mm
