DESCRIPTION

The HD 2 lift-rotate unit raises the workpiece pallet above the conveyor level and turns it into the required orientation. Used in the TS 2plus transfer system, it can keep a constant pallet orientation on closed-loop systems without curves, so the front stays the front.

- Turning angle 90°, on the 90° version the rotational direction can be actuated individually for each pallet
- 90 mm lift, also suitable for pallets with side-mounted identification and data storage modules
- Work operations permitted without additional applied forces
- ESD version, fastening material included
