DESCRIPTION

The HD 2 lift-rotate unit raises the workpiece pallet above the conveyor level and turns it to the required orientation. It is used in TS 2plus transfer systems and can keep a constant pallet orientation in circulating systems without curves, so the front stays at the front.

- Rotation of 180° about the Z axis
- Lift of 90 mm above conveyor level, also suitable for workpiece pallets with side-mounted components such as identification and data storage modules
- Work operations on the unit permitted without additional applied force
- ESD version, fastening material included
