DESCRIPTION

The HD 2 lift and rotate unit raises the workpiece pallet above the conveyor section and turns it into the required orientation. It is used in the TS 2plus transfer system and, in recirculating systems without curves, can keep the workpiece pallet in a constant orientation so that the front stays the front.

- 180° rotation into the required workpiece pallet position
- 90 mm lift, also suitable for pallets with side-mounted components such as identification and data storage modules
- Work operations permitted on the unit without additional applied forces
- ESD-capable, fastening material included
