DESCRIPTION

The HD 2 lift rotate unit turns the workpiece pallet into the required orientation within the TS 2plus transfer system. In recirculating systems without curves it keeps the pallet orientation constant, so the front stays the front. Work operations on the HD 2 are permitted without additional applied forces.

- 180° turning angle around the Z axis
- 40 mm lift, turns the pallet directly above the conveyor section
- ESD design for electrostatically protected areas
- Supplied including fastening material
