ESD safe

DESCRIPTION

The GN300-45-M6-25 clamping lever is used for tool-free clamping and adjustment of flexible holders for side guides in the VarioFlow plus chain conveyor system. As an adjustable lever it can be lifted and repositioned, which makes it easier to apply the clamping force in confined installation spaces.

- Lever in diecast zinc with a black plastic coating
- Screws in steel, galvanized and black chromated
- M6 thread for fastening with sliding blocks
- Lever position adjustable without tools
