DESCRIPTION

The Cubic Connector 50/3 joins three profiles at right angles in a cube-shaped node and is used to build stable frames, machine bases and support structures in assembly technology. Its ESD capability also makes it suitable for electrostatically protected work areas.

- Three outlets for spatial connections at a single node
- Body in diecast aluminum, fastening material in galvanized steel
- ESD-capable for areas protected against electrostatic discharge
- Load capacity up to a bending moment of 140 Nm
