## DESCRIPTION

The T-nut 10 M5 is used to retrofit add-on parts in profile slot 10 of aluminum profiles. It is placed into the slot and turned 90 degrees, with a driving torque ensuring safe rotation in the base of the groove. The ESD design suits electrostatically protected work areas.

- M5 thread, suitable for standard screws
- High groove retention for load-bearing connections
- Galvanized steel for corrosion protection
- ESD-capable

**Notice:** T-nuts have a driving torque for safe turning in the base of the groove. The stated groove retention refers to M8. An insulating cap is required as an accessory.
