DESCRIPTION

The base plate with screw hole is used to bolt leveling feet securely to the floor and is part of the modular leveling foot system for aluminum profiles. Combined with a spindle, it compensates for floor irregularities up to 10 degrees and ensures a stable footing for machine frames and workstations.

- Central screw hole for simple fixing to the floor
- Thread M in the central hole to receive the spindle
- Modular system, spindles and base plates freely combinable
- Powder-coated surface in black
