DESCRIPTION

The LF12 guide rod is the hardened running track of the Bosch Rexroth LF12S roller guide. It acts as the load-bearing shaft on which the rollers run and suits linear guiding tasks in machine and plant engineering.

- solid shaft in stainless steel (VA), corrosion resistant
- induction hardened and polished surface for low wear
- 2900 mm standard length, available as a single rod

TECHNICAL DATA

Condition on delivery	Single rod in standard length
Material	Solid shaft VA (stainless steel), induction hardened, polished
Length (L2)	2900 mm
Mass (m)	0.89 kg
Weight	3.22 kg
Packaging unit	20
Delivery information	ungreased, greasing according to assembly instructions
