

Druckwellensensor für Hubmodul-Kollisionsschutz - Bosch Rexroth 3842540130

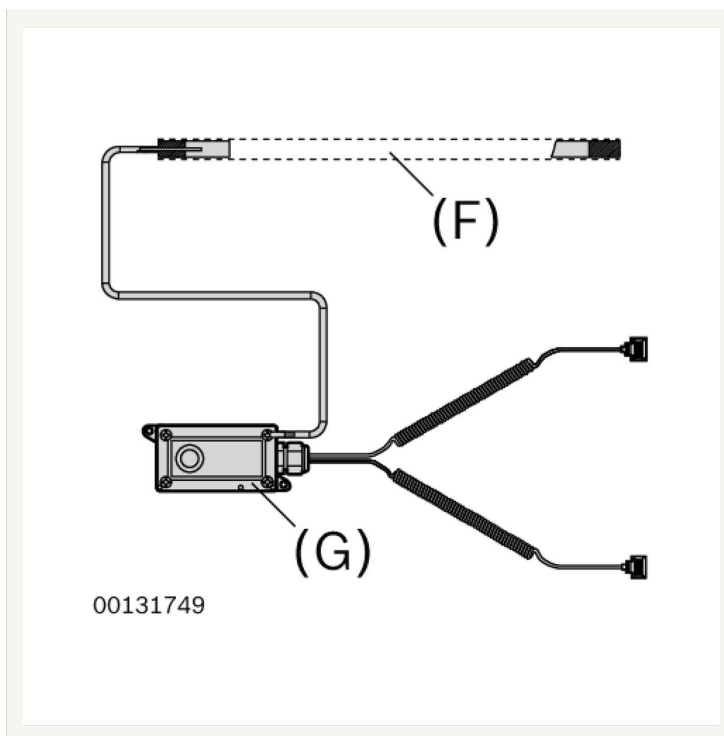

Item no. BRR-3842540130

Manufacturer Bosch Rexroth

The pressure wave sensor signals even light pressure on the pressure wave control strip to the lift module control unit. This provides mechanical collision protection for height-adjustable workstations. It connects directly to the lift module control unit.

TECHNICAL DATA

Country of Manufacture	Poland
Weight	0.25 kg
Zolltarifnummer	90262020

DESCRIPTION

The pressure wave sensor is part of the mechanical collision protection for height-adjustable workstations built with Bosch Rexroth lift modules. It is used together with the pressure wave control strip and connects to the lift module control unit.

As soon as light pressure is applied to the pressure wave control strip, the sensor sends a signal to the control unit and the lift modules reverse a few millimetres. This reliably protects people and components.

- mechanical collision protection for workstations with lift modules
- triggers at even light pressure on the pressure wave control strip
- connects to the lift module control unit
- used together with pressure wave control strip 3842540129

TECHNICAL DATA

Function	mechanical collision protection
Used with	pressure wave control strip 3842540129
Connects to	lift module control unit
Weight	0.25 kg
