ESD safe

DESCRIPTION

The SU.VAR.LOW accessory set provides variable subdivision of drawers in the cabinet systems of Bosch Rexroth manual workstations. It is intended for users who need to store ESD-sensitive components and tools in an orderly and electrostatically safe way.

- ESD-capable to protect electrostatically sensitive components
- Variable layout for flexible adaptation to the drawer contents
- Low height of 40 mm for space-saving use
- Made of galvanized sheet steel, robust and corrosion-protected
