DESCRIPTION

The 60x60 cover cap seals the open ends of aluminum profiles with a 60x60 mm cross-section and profile slot 10 from the Bosch Rexroth assembly technology range. It keeps out dust and debris, gives the structure a clean finish, and protects operators from sharp profile edges. Made from polypropylene (PP) in signal gray, it snaps in without tools and is compatible with standard 60x60 profiles. Through-holes D12.5 and D17 allow routing of cables or fasteners.

- Tool-free installation - press fit directly into the profile end
- Signal gray PP surface - wear-resistant and easy to clean
- Cable or fastener routing via D12.5 / D17 through-holes
- Clean end finish and edge protection for 60x60 profiles
