DESCRIPTION

The Radial Compensation 40 closes the gap between profiles at curved and arc segments in the Bosch Rexroth assembly system. The polyamide (PA) element seats positively in profile slot 10 and compensates the angular offset without interrupting the profile surface. Signal gray RAL 7004 matches the standard color of the Series 40 profile range.

- Precise fit for profile slot 10 of the Rexroth Series 40
- PA material - lightweight, impact-resistant, chemically stable
- Signal gray RAL 7004 - visually consistent with standard profiles
- Pack of 10 for efficient stock management
