

Kurve HOR40x40/VER40x40 für Kabelkanal 40x40 mm, ESD, PP signalgrau - Bosch Rexroth 3842552257

Item no. BRR-3842552257 **Manufacturer** Bosch Rexroth

Manufacturer no. 3842552257

90° curve for horizontal and vertical redirection of 40x40 mm cable ducts in the Bosch Rexroth profile system. The PP housing (RAL 7004 signal gray) is non-conductive by default; the included potential equalizing cable creates a conductive connection between two ducts, meeting ESD requirements. Delivery includes the curve, push-in connecting elements, and potential equalizing cable.

TECHNICAL DATA

Article authenticity	Original product
Condition of article	New
Country of Manufacture	Italy
ESD-Ausführung	ESD (antistatic)
Weight	0.1 kg
Zolltarifnummer	39269097

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

The 3842552257 curve provides a 90° transition for Bosch Rexroth cable ducts in both horizontal (HOR 40x40) and vertical (VER 40x40) orientations. Push-in connecting elements allow fast, tool-free installation within the aluminum profile workstation system. Although the PP material is inherently non-conductive, the supplied potential equalizing cable links two cable ducts conductively, satisfying ESD workplace requirements.

- Single component handles both horizontal and vertical 90° routing
- Push-in connection - tool-free assembly
- ESD-capable via supplied potential equalizing cable
- PP material, signal gray RAL 7004 - matches Rexroth profile system aesthetics

- Scope of delivery: curve, connecting elements, potential equalizing cable

Technical data

Specification	Value
Article number	3842552257
Dimensions	HOR 40x40; VER 40x40
Material	PP, signal gray RAL 7004
ESD	yes
Packaging unit	1 piece
Weight	0.1 kg
Scope of delivery	Curve, connecting elements, potential equalizing cable
