

Unterbau AC Pillar 110-220 V - Bosch Rexroth 3842554209

Item no. BRR-3842554209

Manufacturer Bosch Rexroth

Base substructure for AC Pillar columns operating at 110-220 V, part of the Bosch Rexroth Assembly Technology range. Provides a stable, aligned foundation for column assemblies in modular production and transfer lines. Weight 9.9 g.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.0099 kg

DESCRIPTION

The AC Pillar substructure (110-220 V) is a structural component from the Bosch Rexroth Assembly Technology program, designed as the base element for column assemblies in modular conveyor and transfer systems. It completes the AC Pillar family and ensures correct, stable positioning of column groups during line construction.

- Compatible with the Bosch Rexroth AC Pillar system (110-220 V)
- Low weight of 9.9 g simplifies handling and installation
- Part of the modular Assembly Technology system for flexible line design

TECHNICAL DATA

Property	Value
Article number	3842554209
Description	Substructure, AC Pillar
Operating voltage	110-220 V AC
Weight	9.9 g
