Article authenticity	Original product
Colour	Orange
Condition of article	New
Country of Manufacture	Romania
Lenght	5 m
Weight	0.65 kg
Zolltarifnummer	85444290

DESCRIPTION

Mains cable 3842555605 connects power supply units to workstation components in Bosch Rexroth manual production systems. The 5 m length covers typical distances between the mains outlet and the workstation assembly without the need for extension cables.

- **Standard-compliant insulation:** PUR jacket to H07BQ-F - resistant to oils, mechanical stress and UV exposure in manufacturing environments.
- **Easy identification:** Orange outer sheath allows quick visual recognition within the cable run of a workstation installation.
- **Matched connectors:** CH plug, HD connector and GST termination are designed for the Bosch Rexroth workstation system, providing a secure, tool-free connection.
