

# Streckenprofil 65x70 F13, Zuschnittspreis - Bosch Rexroth 3842993219

Item no. BRR-3842993219

Manufacturer Bosch Rexroth

Aluminium conveyor section profile with a 65x70 mm cross-section, profile form F13, from the Bosch Rexroth assembly technology modular system. Supplied cut to the ordered length, it serves as the structural rail element for conveyor and transfer lines in production and assembly environments. Price applies per cut unit at the specified length.

## DESCRIPTION

The 65x70 F13 conveyor section profile is an aluminium extrusion from the Bosch Rexroth material flow portfolio, providing the load-bearing rail for conveyor guides, transfer systems, and handling lines. It is supplied cut to the customer-specified length - the listed price is a per-cut unit price.

- 65x70 mm cross-section, profile form F13 - dimensionally compatible with Rexroth conveyor system components of this size class
- Extruded aluminium construction: lightweight, corrosion-resistant, and torsionally rigid
- Integrates with the Rexroth conveyor modular system guides, connectors, and fastening elements
- Cut to ordered length - ready to install, no further machining required
