DESCRIPTION

The Roller Section D28 ESD is a component for manual XLean conveyor systems, designed for ESD-safe assembly and production environments. Galvanized steel rails provide structural rigidity, while PP rollers ensure smooth, low-friction material flow.

- ESD-compliant: suitable for handling electrostatically sensitive components and assemblies
- Flexible length: cut to size between 100 mm and 4500 mm
- Durable construction: galvanized steel rail, PP rollers
- System-compatible: integrates with the Bosch Rexroth XLean modular assembly system
