DESCRIPTION

The UM4S return unit with a belt width (BWT) of 1043 mm is a track component for Bosch Rexroth transfer systems. It redirects workpiece carriers by 180 degrees at the end of a line and feeds them directly onto the return path - without manual intervention and without interrupting material flow.

- Designed for belt width 1043 mm - fits precisely into transfer lines of this size class
- Compact design minimises floor space at the line end
- Fully compatible with Bosch Rexroth assembly technology, UM4 series
