DESCRIPTION

The pair of angled joints lets a UNILED SL light be mounted so it can move and aim precisely at the work area. The brackets bolt to the fixing tabs on the end caps; the tilt is then adjusted and locked.

KEY BENEFITS

- Tilt adjustment of the UNILED SL for optimal light aiming
- Sturdy steel bracket for industrial use
- Fixes via the existing end-cap tabs, with no intervention in the light
- Supplied as a complete pair for mounting on both ends

TECHNICAL DATA

- **Model:** UNILED SL light bracket
- **Quantity:** 1 pair
- **Material:** steel
- **Weight:** 100 g
- **Suitable for:** UNILED SL series

APPLICATIONS

Movable, tiltable mounting of a UNILED SL system and workplace light on machines, frames and

workstations.
