DESCRIPTION

The 90x90 mm chute profile at 1500 mm length is a structural aluminium section with Alutin coating, designed for manual production systems where ESD protection is required. Its geometry and coating allow integration into Vario bin slide track assemblies, keeping sensitive components protected throughout handling and presentation.

- ESD-safe: Alutin coating dissipates electrostatic charge reliably
- High dimensional stability: area moment of inertia I_x 118.8 cm⁴ / I_y 88.1 cm⁴
- System-compatible: integrates with the Bosch Rexroth Vario bin modular system
- Supplied in packaging units of 6 pieces at standard length 1500 mm
