

Verteiler Basic 2x4 Control für MTpro-Montagetchnik - Bosch Rexroth

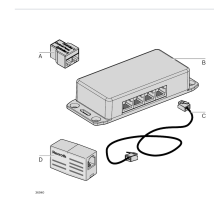

3842559946

Item no. BRR-3842559946 **Manufacturer** Bosch Rexroth

Manufacturer no. 3842559946

Compact 2x4 signal distributor from the Bosch Rexroth Basic line for MTpro modular assembly systems. Splits control and supply signals to up to four outputs, reducing wiring effort at manual and semi-automated workstations. A cost-effective alternative where advanced diagnostics are not required.

TECHNICAL DATA

Article authenticity **Original product**

Condition of article **New**

Weight **0.08 kg**

Zolltarifnummer **94059900**

DESCRIPTION

The Basic 2x4 Control Distributor is a compact signal distribution component for the Bosch Rexroth MTpro modular assembly system line. It routes control and supply connections from one inlet to four outlets, providing a clean wiring hub for control cabinets and operator panels at manual or semi-automated assembly workstations.

- Basic variant: cost-efficient alternative to the Advanced distributor for standard applications without extended diagnostics
- 2x4 topology: one input, four outputs - significantly reduces on-machine wiring complexity
- Low weight of 0.08 kg simplifies mounting on DIN rails and profile systems
- System-compatible with Rexroth assembly technology connecting cables (C) and plug connectors (D)

Technical data

Specification	Value
Type	Basic 2x4 Control Distributor
Line	Assembly Technology MTpro
Topology	2x4 (1 input, 4 outputs)

Specification	Value
Variant	Basic (economic)
Weight	0.08 kg
Manufacturer	Bosch Rexroth
