DESCRIPTION

The Connecting Kit EQ 2/E from Bosch Rexroth is an accessory element for the modular EQ profile system used in assembly and conveyor technology. It provides the mechanical connection between profile sections, enabling the systematic construction of frames, stands, and workstation structures.

- Precisely matched to the EQ 2/E profile system - no reworking or adaptation required
- Compact set containing all parts needed for one connection point
- Supports the Bosch Rexroth modular kit principle for flexible, expandable machine structures
- Low weight of 0.1 kg for easy handling and stock management
