DESCRIPTION

The 240x240 HD2-LS changeover set adapts the HD 2 rotary transfer unit to different rotation and lift configurations within the workpiece pallet transport system. The rotational direction of the HD 2/90° variant can be actuated individually for each workpiece pallet where required.

- Rotation angle 90° or 180° on the Z axis - selectable to match process requirements
- Lift height 40 mm (suitable for turning pallets directly above the conveyor section) or 90 mm (required when side-mounted modules such as identification or data storage units are fitted)
- Maximum permitted total mass moment of inertia: 0.65 kgm²
- All fastening material included in scope of delivery
