

Verschiebeanschlag VA 2/D-130 für Querstrecken, max. 130 kg - Bosch Rexroth 3842564563

Item no. BRR-3842564563 **Manufacturer** Bosch Rexroth

Manufacturer no. 3842564563

Pneumatically retractable slide stop for cross-transfer sections linking multiple parallel conveyor lines. Holds workpiece carriers up to 130 kg and releases them on demand for routing into a parallel line. Mounts directly to ST 2/... conveyors with 45 mm or ST 2/...-H with 50 mm profile width.

TECHNICAL DATA

Article authenticity	Original product
Condition of article	New
Weight	0.1 kg
Zolltarifnummer	84313900

DESCRIPTION

The slide stop VA 2/D-130 controls workpiece carrier flow at cross-transfer sections connecting several conveyor lines. With no air pressure applied, the stop extends automatically to its upper end position, holding carriers securely. Once a lift-and-transfer unit takes over, the stop retracts to clear the line. The compact design fits installations with a track spacing from 90 mm.

- 4 pneumatically selectable positions: upper and lower end positions, latch extended and retracted
- 3 sensor-queryable positions: top, bottom, and extended stop bar
- Reversing operation supported
- Compatible with workpiece carriers WT 2, WT 2/F, WT 2/H, and WT 2/F-H
- Supplied assembled, including mounting hardware, angle push-in fittings (Steckfix), and position sensors

Technical data

Parameter	Value
Type	Slide stop VA 2/D-130
Max. workpiece carrier total mass	130 kg
Max. operating temperature	60 °C

Parameter	Value
Required compressed air supply	4 - 6 bar
Pneumatic push-in connector	Ø 6 mm
Mass	15 kg
Housing	Aluminium, hard-anodized
Latch	Steel
Compatible conveyor profiles	ST 2/... (45 mm), ST 2/...-H (50 mm)
Min. track spacing for installation	90 mm
Delivery state	Pre-assembled
Article number	3842564563
