

IBC container for storage and transport of liquids - Auer BIB IBC 500

Item no. BIB IBC 500

Manufacturer Auer

The Auer Packaging BIB IBC 500 is an intermediate bulk container for storing and moving larger volumes of liquids. Its compact footprint packs high capacity into a small area and handles stably in warehouse and production.

TECHNICAL DATA

Weight

1 kg

DESCRIPTION

The Auer BIB IBC 500 is an intermediate bulk container for storing and transporting liquids and flowable goods within a plant. It holds larger volumes in a single unit and cuts handling effort compared with individual containers.

BENEFITS

- High capacity on a compact footprint for efficient use of storage space
- Stable construction for repeated filling and transport cycles
- Uniform handling simplifies picking and internal logistics

TECHNICAL DATA

- Manufacturer: Auer Packaging
- Type: IBC bulk container
- Model: BIB IBC 500

APPLICATIONS

Used in production, chemicals, food processing and logistics wherever liquids or bulk goods are stored and moved in larger quantities.
