

Euro container with coupling system closed handles 80 x 60 x 12 cm - Auer EG VL 86/12 HG

Item no. EG VL 86/12 HG

Manufacturer Auer

Closed Euro container with an 80 x 60 cm footprint and 12 cm height for 45 litres, with closed handles on all sides. The side coupling system links it securely to transport dollies. Made of PP with a reinforced, closed base.

TECHNICAL DATA

Weight **3.15 kg**

DESCRIPTION

The EG VL 86/12 HG Euro container holds 45 litres on an 80 x 60 cm footprint at 12 cm height. Unlike the open version it has closed handles on both the end and long sides, so no dust or dirt enters through the grip opening. The coupling system moulded into the long side locks it firmly to Auer transport dollies.

BENEFITS

- Closed handles keep the interior largely free of dust and dirt.
- Coupling system on the long side secures container and dolly against sliding.
- Reinforced, closed base withstands heavy flat loads.
- 45 litres on the DIN Euro size 80 x 60 cm fit standard racking and conveyors.
- PP build is impact resistant and stands up to many operating media.

TECHNICAL DATA

- External dimensions L x W x H: 80 x 60 x 12 cm
- Internal dimensions L x W x H: 76.7 x 56.7 x 10.5 cm
- Usable inner height when stacked: 9.2 cm
- Stacking height: 10.8 cm
- Volume: 45 litres
- Side design: closed

- Base design: reinforced, closed
- Coupling system: on the long side
- Handles on end face: closed
- Handles on long side: closed
- Consists of: 1 x EG 86/12 HG and 4 x EG V 86
- Material: PP
- Colour: silver grey similar to RAL 7001
- Weight: 3.15 kg

APPLICATIONS

For order picking, in-plant transport and storage of flat, heavy parts in dust sensitive areas, especially together with transport dollies of the coupling range.

Slight colour variation cannot be ruled out due to the raw material.
