

Closed euro container with interlocking system 80 x 60 x 52 cm - Auer EG VL 86/52 HG HO

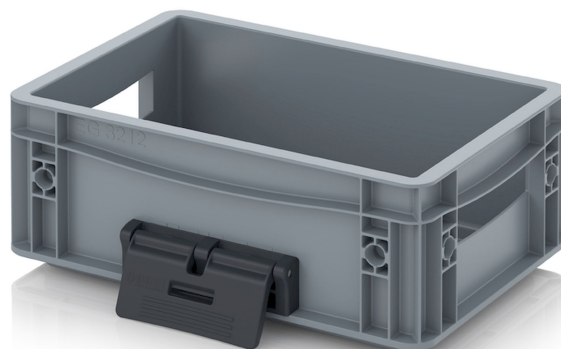

Item no. EG VL 86/52 HG HO

Manufacturer Auer

Closed PP euro container with 228 litres of volume and an interlocking system on the long side. The 80 x 60 x 52 cm outer size matches the euro format and the reinforced base carries heavy loads. This version has closed front grips and open long-side grips.

TECHNICAL DATA

Weight	7.37 kg
--------	---------

DESCRIPTION

The Auer EG VL 86/52 HG HO is a closed stacking euro container made of polypropylene, measuring 80 x 60 x 52 cm on the outside and holding 228 litres. The interlocking system along the long sides locks stacks in place and makes the container a matching footprint for euro transport dollies in the 80 x 60 format.

BENEFITS

- 228 litres of usable volume on a compact 80 x 60 cm euro footprint
- Interlocking system on the long side secures stacks by form fit
- Reinforced, closed base for high load capacity and clean handling
- Usable internal stacking height of 49.2 cm for bulky parts
- Durable PP, temperature resistant and largely chemical resistant

TECHNICAL DATA

- External dimensions L x W x H: 80 x 60 x 52 cm
- Internal dimensions L x W x H: 76.7 x 56.7 x 50.5 cm
- Usable internal stacking height: 49.2 cm
- Stacking height: 50.8 cm
- Volume: 228 litres
- Side design: closed

- Base design: reinforced, closed
- Interlocking system: long side
- Front-side grips: closed
- Long-side grips: open
- Material: PP
- Colour: silver grey similar to RAL 7001
- Weight: 7.37 kg

APPLICATIONS

The container suits warehousing, order picking and in-plant transport, for example for raw parts, assemblies or semi-finished goods. Combined with a Maxi HD transport dolly it forms a rolling transport unit without a separate pallet.

Note: slight colour variations cannot be fully avoided due to the raw material.
