

ESD Compartment Divider Set 60 x 40 cm, 14 cm High - Auer ESD EG SGF 6417

Item no. ESD EG SGF 6417**Manufacturer Auer**

This ESD divider set splits a dissipative Euro container with a 60 x 40 cm base into four separate compartments. Its surface resistance of 10^3 bis 10^{10} Ohm drains static charges under control and protects sensitive components during storage and transport. Recommended for the ESD EG 64/17 HG container.

TECHNICAL DATA

Weight **0.452 kg**

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The ESD compartment divider organises an ESD Euro container with a 60 x 40 cm base into individual compartments and keeps electrostatically sensitive components separated and tidy. A surface resistance of 10^3 bis 10^{10} Ohm ensures controlled charge dissipation to IEC 61340-5-1.

BENEFITS

- Dissipative material with a surface resistance of 10^3 bis 10^{10} Ohm protects ESD-sensitive assemblies.
- The set of one longitudinal and one cross divider forms four clearly separated compartments.
- The 14 cm compartment height suits the ESD EG 64/17 HG Euro container.
- Plug-in dividers fit and remove without tools.

TECHNICAL DATA

- Version: set for 60 x 40 cm base
- Compartment height: 14 cm
- Recommended for: ESD EG 64/17 HG
- Surface resistance: 10^3 bis 10^{10} Ohm

- Contents: 1 x longitudinal divider, 1 x cross divider
- Weight: 0.452 kg

APPLICATIONS

For electronics manufacturing, repair and stores where ESD-sensitive parts are sorted, protected and kept ready to hand.
