

ESD Compartment Divider Set 1 Long and 1 Cross Divider for Euro Container 60 x 40 cm - Auer ESD EG SGF 6475

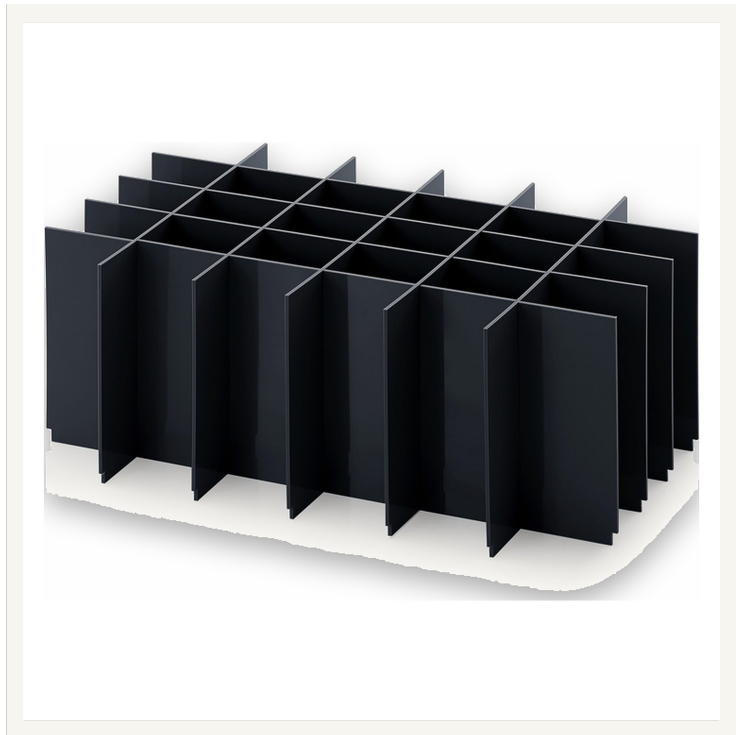

Item no. ESD EG SGF 6475

Manufacturer Auer

Low ESD compartment divider set for dividing conductive Euro containers with a 60 x 40 cm footprint. One long and one cross divider with a 4.5 cm height sort flat components and suit the shallow ESD EG 64/75 HG container.

TECHNICAL DATA

Weight **0.145 kg**

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

This low ESD compartment divider splits conductive Euro containers with a 60 x 40 cm footprint into fixed compartments and protects sensitive electronic components against uncontrolled discharges. The set includes one long divider and one cross divider with a 4.5 cm height and suits the shallow ESD EG 64/75 HG container.

BENEFITS

- Conductive material with a surface resistance of 10^3 to 10^{10} ohms in line with IEC 61340-5-1
- Fixed compartment layout keeps flat components and circuit boards clearly sorted
- Low 4.5 cm divider height matches the shallow ESD EG 64/75 HG
- Tool-free assembly via a slot-in system

TECHNICAL DATA

- Version: set for 60 x 40 cm footprint
- Contents: 1 x long divider, 1 x cross divider
- Divider height: 4.5 cm
- Recommended for: ESD EG 64/75 HG

- Surface resistance: 10^3 to 10^{10} ohms
- Weight: 0.145 kg

APPLICATIONS

For orderly storage and in-house transport of flat ESD-sensitive components such as circuit boards in electronics manufacturing, repair and goods receiving.
